## DETAILED ACTION

## Claim Rejections - 35 USC § 103

1. Claims 1-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6,262,719 to Bi et al. The detailed explanations of the rejections are found in the first office action paper number 6, dated 12-16-2002.

In response to the applicant's statement on page 13, lines 9-11, stating that Bi's reference fails to indicate that the icons are always present, such a claim may be true, however one skilled in the art would have found it obvious to incorporate a reveal routine to the hot icon area if such a feature was desired due to the extreme conventionality of such a function. Examples of this reveal routine are is the Microsoft Windows right click menu reveal and the mouse over reveal function. It would have been obvious to one skilled in the art to incorporate such a feature because of its power saving and display space conserving potential.

In reference to claims 25-28, the new limitations of displaying the interface controls near a point of contact between said digitizing pen and digitized writing surface is obvious to one skilled in the art. It is extremely conventional for input dialogue box to appear at the location of stylus contact. Several Windows and stylus-based platforms utilize this appearance feature. One skilled in the art would have been motivated to incorporate such an appearance feature to conserve display space and maintain the conventionality of such a common computer based feature.

## Response to Arguments

2. Applicant's arguments filed 12/15/2003 have been fully considered but they are not persuasive. The "mouse over" or "stylus over" accompanies by a gesture to reveal a menu is

Art Unit: 2675

Page 3

domain since March of 1996, with the inception of the idea preceding the filing date of 1993 as

well known in the art as demonstrated by the Moran patent. It has been known in the public

made apparent in the Background of the Invention section of the disclosure. As Moran

establishes, the idea of a gesture invoking a pop-up menu has been known in the art for at least

10 years, a practice that is certainly well known in the art.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Ming-Hun Liu whose telephone number is 703-305-8488. The

examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Joseph Mancuso can be reached on 703-305-3885. The fax phone numbers for the

organization where this application or proceeding is assigned are 703-872-9314 for regular

communications and 703-872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 703-305-4750.
